CUSTOMERS AFFIRM BLAZE 100 ON FUEL POWER, BETTER LONG-DISTANCE TRAVEL
Malaysian Motorists Put Petron Blaze 100 To Test

KUALA LUMPUR – Malaysia’s first and only high-performance RON 100 fuel was tested for its power, engine responsiveness and fuel consumption by Malaysian customers using various vehicles. The test results found that Blaze 100 improves driving performance, and is the best fuel for long-distance travel

The top benefit cited by customers is instant responsiveness, followed by better fuel economy and a fuel that is best for an enjoyable smooth drive on long-distance travels.

“It feels more powerful as it provides me with better acceleration. My engine feels much more responsive with RON 100 and the pick-up is faster. You can feel the improved power when overtaking,” said Daniel Chin Wei Xiong who have tested Petron Blaze 100 on his personal Nissan GT-R.

Volkswagen Golf owner, Lim Jae Sam concurred, “The fuel offers me a slight power gain and more responsive acceleration.”

Motorcyclist Tan Meng Keat who fueled his Yamaha MT-09 using Blaze 100 said, “I really feel the burst of power and acceleration when I twist my throttle. The response is instant. It only takes me six seconds to get from a rolling 50kph to 100kph.”

When Petron Malaysia first launched the fuel in 2016, the market was abuzz with the introduction of the high energy fuel that took fuel performance to a whole new level. Blaze 100 is the perfect choice for consumers who are looking for a fuel to provide exciting high performance drive experiences, especially on long distance travels.

The Company has invested in a premium formulation to deliver improvements in engine protection, mileage and fuel economy. With a superior TriAction Advantage formulation, which combines a fully-synthetic detergent, organic combustion improver and friction modifier, the fuel burns more efficiently, thus enhances engine responsiveness and cleanliness while lowering fuel consumption, as concluded by the test drives.

Daniel commented, “My engine is much smoother now and it gave me better mileage. It is such an enjoyable feeling to drive with RON 100, totally different.”

Tan said, his motorcycle gave a smoother sound with less vibrations, while ignition was easy. The Nissan GT-R engine was also ‘smoother and slightly quieter’ when running on Petron Blaze 100, commented Daniel.

The customers also tested their vehicles on the highways to check on fuel consumption. Their feedback were unanimous – Blaze 100 is fuel-efficient.

“My fuel consumption has improved by 15 per cent as compared to other fuels. It is much better with Petron Blaze 100 and I believe the fuel can make a difference to my running costs in the long run. Definitely worth the premium,” said Lim on his Volkswagen.

Nissan owner, Daniel said, “It gives me better mileage than RON 97, which I usually pump. A full tank gives me about 350km, which can last me between one to two weeks. I do believe Petron Blaze 100 will provide better value for money in the long run as it also gives me engine protection on top of the better mileage.”

Choong Kum Choy, Petron Head of Retail and Commercial Business said, “We are committed to deliver innovative products that are exceptional, products that enhance customer experience. Our Blaze 100 is one such product. With the demand for Blaze 100, we have made Blaze 100 available at more than 100 stations today. This is to ensure that more consumers can have the opportunity to enjoy this exceptional fuel.”

Blaze 100 is now available at more than 100 service stations throughout Malaysia to fuel its customers’ demands for better fuel performance.
